

Innovative Recruiting & Research Services

RECRUITING RESEARCH: Addressing The Needs Of Organizations With High-Volume Hiring Needs And Limited Recruiting Budgets.

Our revolutionary hourly *Recruiting Research* services combine all the advantages of our traditional retained recruiting techniques with the significant cost-saving and time-saving benefits of hourly research.

“*HRM's recruiting research service is a breath of fresh air in our highly competitive labor market. We were amazed at the high number of quality candidates they provided. Even more impressive was the money we saved on placement fees – because there were none! We hired as many as we wanted with no placement fees!*”

Our *Recruiting Research* provides you with a comprehensive weekly report detailing the backgrounds and interests of every candidate identified and contacted during the search – both qualified and not, interested and not.

Fees for research assignments are based upon a *flat hourly rate* for the search time invested, not the annual equivalent earnings of each candidate hired. This means you are free to make an unlimited number of hires from the research report at any time. Deep discounts on the hourly rate are offered for multiple research requests.
